

Mental Health Transformation Grant

Project Recovery Beaver County Behavioral Health - Pennsylvania

Local Service Area: Beaver County, PA

Primary Service Focus: Prevention/Early Intervention

Secondary Focus: Employment and Trauma

Project Director: Kimberly Hall

Project Team Members: Nancy Jaquette, Holly Wald, Matt Koren, Dawn Hall

CMHS Project Officer: David Morrisette

Evidence-Based Practice(s): Comprehensive, Continuous, Integrated System of Care (CCISC); Seeking Safety; WRAP; Motivational Interviewing; Supported Employment; Illness Management Recovery

Project Description: *Project Recovery* is developing a countywide peer-driven, recovery-oriented system of care that is culturally and linguistically competent and utilizes evidence-based and best practice interventions by expanding the Comprehensive, Continuous, Integrated System of Care (CCISC) model to encompass four of the SAMHSA Strategic Initiatives: Prevention, Trauma-Informed Care, Housing, and Employment. *Project Recovery* goals are 1) Build on and expand the Comprehensive, Continuous, Integrated System of Care (CCISC) model currently being implemented, so that services and supports are welcoming, aimed at prevention, COD capable, trauma-informed, culturally and linguistically competent (CLC), and utilizing evidence-based or best practice methods; 2) Build a capacity within the Beaver County service system to provide outreach, early identification, and wellness; 3) Develop an information system that offers all participants quick access to an individual's service, crisis, and WRAP plans in order to provide appropriate recovery-oriented interventions at each point in the system of care SOC; 4) Expand the Permanent Supported Housing to prevent homelessness and promote community integration, and to meet the needs of peers with complex conditions; and 5) Offer mobile supported employment to increase vocational options and promote recovery.
